

## Actuating Electrical and Manual Device for Disconnecting Switches Maira EH 30/MH 30

### Technical Characteristics

Nominal motor voltage	220 V
Nominal control voltage	220 V
Motor speed for nominal couple	min. 1400 rpm
Nominal frequency	50 Hz
Couple for manual actuating in normal conditions (+20°C)	≤ 2,5 daNm
Main shaft rotation angle	90°
Anti-condenser and heating resistor power	50 W
Electrical hold voltage for control and auxiliary circuits	2000 V
Nominal current for auxiliary circuits	10 A
Protection	IP 54
Motor nominal power	250 W
Free signaling closed contacts	10 pcs
Free signaling open contacts	10 pcs
Actuation	electric & manual
Outdoor temperature range	-40°C...+55°C
